Harbinger Interactive Learning Team to Visit Safety 2018 Professional Development Conference & Exposition, San Antonio

Catch up with the team for an insightful discussion on Harbinger's modernization services for safety training.

Representatives from Harbinger Interactive Learning will participate in the Safety 2018 Professional Development Conference & Exposition, from Jun 3 – Jun 6, 2018, for the second year in a row. The team plans to indulge in some meaningful conversations around safety training. Safety training is a crucial compliance need and there are many organizations which offer eLearning courses for the same. With Flash designated for a sunset, most of these organizations have a large volume of legacy safety training content sitting idle, which, if put to the right use, can positively impact their bottom line. Harbinger has been working with such companies to modernize their safety courses using automation and its frameworks in record timelines.

Safety 2018, an annual conference organized by The American Society of Safety Engineers [ASSE], aims to get together over 5,000 OSH professionals to learn about best practices, case studies, latest technology and advancement of safety efforts at their workplaces. ASSE is the preferred source for education among safety professionals, providing valuable training, networking, knowledge, skills and continuing education. ASSE has a long-standing reputation of delivering top-quality occupational safety and health education and training members can immediately put into practice. To know more about Safety 2018, visit <https://safety.asse.org/>.

Utkarsh Mahajan, General Manager - Business Development, Harbinger Interactive Learning, who would be leading Harbinger's team at the conference, says, "It's our second year at this conference and we are really excited. Last year, we discovered that this conference provides a unique learning opportunity for professionals in the safety domain."

Utkarsh adds, "Our key focus at an organization level this year is the transformation and modernization of legacy Flash content at workplaces. Having worked on multiple successful modernization projects, Harbinger's relevant insights can come in handy for organizations looking at this transition. We can help people understand how automation can expedite the whole modernization process and result in a quicker time-to-market."

To get in touch with the team at the conference, drop us a note at info@harbingerlearning.com, and we shall get in touch with you.

About Harbinger Interactive Learning

Harbinger Interactive Learning is a global design and development company specializing in eLearning modernization and custom eLearning solution development. We have over 25 years of experience in delivering innovative learning solutions for various verticals like publishing, life sciences, BFSI, retail, and high-tech.

The company's design and development capabilities extend from deep understanding of learning, strong skills in instructional design, visual design, and expertise in digital learning technologies. The experience of delivering custom solutions for each of the above-mentioned sectors has strengthened Harbinger's expertise and helps it in consistently creating learner-centric, customized, and cost-effective training solutions.

Harbinger Interactive Learning's services have been appreciated by various learning bodies. Harbinger is a bronze award winner in the Brandon Hall Group Excellence Awards 2017. For two consecutive years, in 2015 and 2016, Harbinger Interactive Learning has been shortlisted as a finalist in the "Learning technologies supplier of the year" category of the prestigious 'Learning Technology Awards'. It has also been adjudged with the Chief Learning Officer award. For more information, visit www.harbingerlearning.com, or contact at 425.861.8400
